

Providers are Available to Facilities Clinical Team 24/7

HIPAA compliant platform and resources for Telemedicine are available

On-call 24/7 accessibility to facilities when guidance and orders are needed.

A Legacy of Care. A Future of Possibilities

For over 20 years, Huntingdon Behavioral Health has been a trusted provider of compassionate, high-quality care for individuals and families. Today, as part of ACE Behavioral Health, we continue that legacy with expanded services, enhanced care models, and a forward-looking approach to behavioral health and long-term care. While our name has evolved, our mission remains the same — to enhance lives through dignity, respect, and clinical excellence.

Who We Are

About Us

Ace Behavioral Health was founded to provide psychiatric and psychological care. We are here for those in need of diagnosis and treatment of a mental health condition. Our program is developed to assist adults in their behavioral and mental health to achieve their highest level of independence and functioning.

We are a full-service behavioral health provider with a team of over 90 psychologists, psychiatrists, APRNs, and licensed clinical social workers in more than 220 skilled nursing, memory care, and assisted living communities throughout the state of Florida.

Our psychiatrists and psychiatric nurse practitioners serve as consultants to the facility's attending physicians and nursing staff, lending their medical expertise to improve the quality of care for their patients.

Medication Management and Gradual Dose Reductions

Medications are monitored for Gradual Dose Reduction

Our teams apply a multidisciplinary approach to achieve optimal results for residents by integrating pharmacological and behavioral interventions. Because Gradual Dose Reduction (GDR) is a top priority, our teams closely manage and monitor the use of psychiatric drugs, delivering the lowest possible doses to provide residents with the highest quality of life.

We are the only behavioral health company that has introduced a pharmacy consultant to our management team, who can consult directly with your pharmacy, physicians, and nursing team. This allows you to improve dose reduction outcomes and get targeted analytics.

Why Choose Ace Behavioral Health?

We have served the Florida long term care market over 20 years. We are the industry leader because of our outstanding business model and our ethical and professional practitioners.

We are trained and certified in best practices to care for the mental health of the elderly. Our trustworthy professionals work with staff and residents to obtain the best possible outcomes.

How do you access our services?

If you feel that a resident is in need of our services, notify a member of the clinical staff at the facility.

Upon receipt of an attending physician's order, the psychologists perform an initial evaluation, providing psychotherapy and/or behavioral health management when clinically appropriate. Our psychiatrists then perform an initial evaluation and psychiatric medication management when clinically indicated. This collaboration provides continuity of care for the residents and another opportunity for medical professionals to support the well-being of your loved ones.

How Residents Benefit

- ✓ Enhanced physical and psychological well-being
- ✓ Reduced reliance on psychiatric medication
- ✓ Increased interest in physical, occupational, and speech therapy
- ✓ Reduced agitation and anxiety
- ✓ Decreased aggressive behaviors
- ✓ Increased participation in daily living activities
- ✓ Improved communication with staff and family
- ✓ Increased family satisfaction
